WORK EXPERIENCE

Mediafin 2022-2025
Front-end Engineer

Develop the websites for Belgium's largest financial newspapers, delivering modern platforms for multiple high-profile brands. Implement scalable solutions to ensure user experiences focusing on performance, accessibility, and responsiveness. Collaborate with cross-functional teams.

Tele Columbus AG 2021-2022
Front-end Engineer

Maintain and enhance the Pyur website. Develop new features and functionalities, such as a fully responsive product configurator.

Argenta 2019-2021
Front-end Engineer

Develop and maintain the Argenta website, including multiple simulation tools written in React. Create and launch the European branch website, ensuring consistency in branding and functionality across multiple markets.

Elimity 2018-2019
Front-end Engineer

Rebuild the web application by migrating from AngularJS to the latest version of Angular, improving performance and maintainability. Enhance the user experience for GDPR monitoring in large companies, focusing on data-heavy tables and seamless interaction for efficient data management.
